Concussion Signs and Symptoms Checklist

Student's Name:
Student's Grade:
Date/Time of Injury:
Where and How Injury Occurred :(Be sure to include cause and force of the hit or blow to the head.)
Description of Injury: (Be sure to include information about any loss of consciousness and for how long, memory loss, or seizures following the injury, or previous concussions, if any. See the section on Danger Signs on the back of this form.)
Use this checklist to monitor students who come to your office with a head injury Students should be monitored for a minimum of 30 minutes. Check for signs or symptoms when the student first arrives at your office, fifteen minutes later, and at the end of 30 minutes. Students who experience one or more of the signs or symptoms of concussion after a bump, blow, or jolt to the head should be referred to a health care professional with experience in evaluating for concussion. For those instances when a parent is coming to take the student to a health care professional, observe the student for any new or worsening symptoms right before the student leaves. Send a copy of this checklist with the student for the health care professional to review.
Is confused about events Repeats questions Answers questions slowly Can't recall events <i>prior</i> to the hit, bump, or fall Can't recall events <i>after</i> the hit, bump, or fall Loses consciousness (even briefly) Shows behavior or personality changes Forgets class schedule or assignments PHYSICAL SYMPTOMS Headache or "pressure" in head Nausea or vomiting Balance problems or dizziness Fatigue or feeling tired Blurry or double vision

SIGNS AND SYMPTOMS Is confused about events Repeats questions Answers questions slowly Can't recall events <i>prior</i> to the hit, bump, or fall Can't recall events <i>after</i> the hit, bump, or fall Loses consciousness (even briefly) Shows behavior or personality changes Forgets class schedule or assignments PHYSICAL SYMPTOMS Headache or "pressure" in head Nausea or vomiting Balance problems or dizziness

Numbness or tingling Does not "feel right" COGNITIVE SYMPTOMS Difficulty thinking clearly Difficulty concentrating Difficulty remembering Feeling more slowed down Feeling sluggish, hazy, foggy, or groggy
EMOTIONAL SYMPTOMS Irritable Sad More emotional than usual
Additional Information about This Checklist:
This checklist is also useful if a student appears to have sustained a head injury outside of school or on a previous school day. In such cases, be sure to ask the student about possible sleep symptoms. Drowsiness, sleeping more or less than usual, or difficulty falling asleep may indicate a concussion.
To maintain confidentiality and ensure privacy, this checklist is intended only for use by appropriate school professionals, health care professionals, and the student's parent(s) or guardian(s).
Resolution of Injury:
Student returned to class
Student sent home
Student referred to health care professional with experience in evaluating for concussion
